

The top part of the image shows a detailed cross-section of a V-belt. It features a series of V-shaped grooves on the inner surface, which are designed to fit into the pulleys of a belt drive system. The cross-section also shows the internal structure of the belt, including the reinforcement layers and the outer cover. A large, semi-transparent 'DAYCO' watermark is visible across the middle of the image.

The bottom part of the image shows a perspective view of a V-belt. The belt is black and has the 'DAYCO' brand name and '1000' size printed repeatedly along its length. The belt is shown in a curved, S-shape, highlighting its flexibility and the V-shaped grooves on its inner surface.
